

POLITICAL.—Grant's candidacy for a third term would convey a threat of a large standing army over the poor and heavy taxation of which it would support. Kingly government is despotic.

There was a big name, and a good deal of it, last Tuesday, but the name was lacking, the name that damaged the ardor of the *Philadelphia Chronicle*.

Some think Grant's popularity is not increased by the incidents which a few months ago took place in Philadelphia. (Childs, Drexell and Doris) have exhibited in compelling him.—*Critics*.

The selection of Chicago as the place for holding the Republican convention seems to have turned chiefly upon the question of cheaper beer.—*Balt. Sun*.

The Cleaveland Citizen, therefore the Greenback paper of that county, has given up the greenback cause as hopeless, and now comes out Democratic in all this.

All this name and display will not make Grant a great man, but will fix his status in history, nor even in the opinion of his fellow men. A hollow show like this can be of no service to the cause of freedom. The people see through it. They know it is not spontaneous; it is; they ask themselves if this was not done to have all this fuss about it. They know of nothing. It is absolute folly to suppose that the *Philadelphia Times* says, that he is the most illustrious soldier and citizen of the nation.—*Leicester Intelligencer*.

The progress that Congress is making in legitimate business is very gratifying. It is very rare that so much work is accomplished before the holiday adjournment as has been accomplished at this session.—*Balt. Sun*.

SENATED BIRMINGHAM says: "There is hardly a human being but that our next President will be a Democrat."

To the Republican leaders, now engaged in devising schemes to secure the electoral vote of New York and other States next year. Remember that it is a Democratic Congress that counts this year.—*Washington*.

The chances of New Jersey are in such a condition to State tax, it is said, will be needed next year. How about Pennsylvania under Republican management?

Mr. JIM BLAINE's press agents in Maine telegraphed a great amount of talk about appealing to the Courts in refusing the bill to crowd the election returning. They did not tell the Courts—*to a Republican judge, who would not act on the Governor in every particular, in accordance with the press agent's don't telegraph this. Much the word.*

We get the decision of the Court in the Boston papers.—*Conn.*

COULD NOT DIBBLE by a reporter Wendell Phillips said of Hayes: "He is devoid of principle and honor. He is a fraud. His equivocates and falsifies. The president of the United States should not be a hypocrite."

WHEN we remember that Blaine helped to stent the Presidency, we can't waste any tears on him or offer him any resounding endorsement of his little domestic affairs.—*Philadelphia Chronicle*.

ALL the "rebel soldiers" in the House voted for \$2,000,000 to pay the pensions of Union soldiers. Do the statists think this an "outrage" too? Union soldiers hardly can.

THE Patriot says, "Abolish the Electoral College," and let Presidents and Vice Presidents be elected by the direct vote of the people. Republican plotting to upset our present form of government may make such a step necessary.

The Republicans heartily approved what their party did in Louisiana, South Carolina and Florida, and similarly when the Electoral Commission overruled the will of the people in 1870.—*Balt. Sun*.

But don't they boast about Maine? Something must pinch 'em!

THE New York Sun advances the theory that John Sherman's Presidential ambition is the only thing that stands between Grant and the Republicans, and when the Electoral Commission overruled the will of the people in 1870.—*Balt. Sun*.

But don't they boast about Maine? Something must pinch 'em!

GOV. GARRISON, of Maine, makes a statement to the public, in which he says: "The great hue and cry about conspiracy," "fraud," &c., arises from the fact that we have taken the constitution for our guide, justified by the opinions of the Supreme Court of the State, and the advice of the friends of the law, gentlemen of the forum, and have not resorted to substitution, alteration or unauthorized amendments of the return, committed to us for examination and to us to be transmitted to the Legislature for their final action. In other words, we have not resolved into a committee, a board to investigate, fraud, bribery, illegal proceedings at the polls, and the thousand and one charges of corruption that are abroad, but have left this whole task to the action of the Legislature, where it properly belongs. The Governor and his council have recognized the fact that the people of Maine have adopted a constitution and declared it to be the supreme law of the State. They have followed the requirements with fidelity and impartiality, and when an intelligent public has hasted away the mists and discredited politicians have thrown around our action, and the vituperation and abuse given place to reason and fair investigation, any condemnation of our cause, either by the Democracy of our country, or by any enlightened and honorable politicians of any party, will be acknowledged with due submission."

SECRETARY SHERMAN speaks of the Maine Democrats as those "idiots," "house breakers" and "thieves"; but as the worst that can be said of them is that they have simply followed the precedent set by Mr. Sherman and his friends, we are forced to conclude that the Secretary has lost both his head and his temper. This theory is strengthened when we read further that Mr. Sherman advises the New York Republicans not only to do what he charges the Maine Democrats with doing, but to "zoo them one better."—*Balt. Sun*.

"Who is Dan Cameron for?" is the Washington correspondent of the *Cincinnati Times*. "It looks to me as if, instead of being in favor of Grant first and Blaine second, as has been said, Cameron is really for Sherman, first, last, and all the time. It is apparent that his first choice is Grant; it is a thin deceit to cover up his work for his wife's uncle. He don't expect Grant to be a candidate any more than I do, and I feel pretty well satisfied that he won't run again."

Dan Cameron was elected chairman of the Republican National Committee by two majority, and two negroes who voted for him were substituted out of the Treasury Department!

CONGRESSMAN LADD, of Maine, says that Gov. Garrison's business in administering the law under the constitution has given renewed vitality to the Democratic party, and that it is respected everywhere in the State. In his refusal to accede to the demands of the Republican stalwarts, with Blaine at their head, to change the returns after they had been filed, with the Secretary of State, the Legislature, when once it did, will undoubtedly investigate the wholesale frauds, vileness and corruption practiced by the Republicans in the late election, and do justice to all. So says a statesman from Washington to the editor of the *Advertiser*.

The Republican journals, as usual, concluded to conclusions too quickly. It turned out that the rough who shot and killed Kelly, at the Democratic primaries in Philadelphia, was an office-holder under the Republican city government; The *Times* says he has been known as a criminal for years, and set he has always held public offices under the Philadelphia ring. "Birds of a feather,"

is having been claimed that the election returns of Maine have been falsified and up, and that Republican frauds have been committed by the Governor and Council this year, as was their right and duty, under the law, of the recent election. The Governor and Council have just finished giving the legislature to the people, and the result reached is that the people, who have 78 members of the House to 58 Republicans, have 11 Republicans to 11 Republicans. There are 12 vacancies.

Of course a rule that is properly applied to one return should be applied to the aggregate result changed to the complexion of the majority it is the fault of the law and not of the state council. Even the equity of giving the Republicans control of the state, by a failure to enforce their own laws, would be more apparent if two elections had not shown their party to be in a majority in the legislature. They had the exclusive power, and they ought to exercise it without scruple. Loose practices, open violations of the election law and palpable infractions of prescribed forms, intended for the protection of the purity of the ballot, became common, and the majority were powerless to prevent these abuses. For the first time in more than half a generation the combined opposition won a victory last year, and they elected a Governor who has, at a single blow, turned into a most conspicuous position. He is not to be known, but the election in September, that the gross irregularities heretofore practised would not be subjected to the plain requirements of the constitution and the laws of the state.

Mr. Blaine and his friends and followers who had claimed a great victory, knew very well that the application of the law would throw them into a minority. Hence they began to shout, and during the period of their ascendancy, a crowd of ex-Governors, ex-Senators and noisy politicians, to intimidate the Governor in the discharge of his duty, and to raise a cry of foul play. All this clamed did not distract Governor Garrison in the least, nor shake his purpose of seeing the law faithfully executed. He stood as a rock, and quite dignifiedly let the rioters understand they had to deal with an enemy who could neither be subdued from his convictions nor scared from carrying them into effect. The result is that the Republicans have lost the Legislature. It is not pretended that any wrong has been perpetrated, or that the Governor and Council have done anything like to diminish the law or stand on the statute books. A dispatch from Portland says: "The Democrats are exultant over this application of rigid constitutional principles to the official canvass of the state. The boast of it as a just retaliation for the doings of the Johnson returning Board and the Electoral Commission. It is another eight to seven, case, some of them say, "with the eight on our side this time." The view of the matter does injustice to Gov. Garrison and his Council, who have certainly followed the letter of the law in their action, whatever unfairness that action may have wrought. The fact seems to be that the chronic looseness with which the electoral laws have been observed during the Republican supremacy has given Gov. Garrison and his associate, the Hon. Ebenezer Phillips, a chance to reverse the Republicans, to reverse the law, and is not calculated to further the designs of him.

SENATOR BAYARD, the other day said to a *World* correspondent: "Members of Congress are not business men. They don't understand the current needs of business. The national banks do not stand them and the volume of the currency is regulated by them accordingly. The objection to national banks is that they are sources of profit to their managers. Well, usually, whether bankers or members of Congress, don't invest their money and worry from morning until night for nothing. Last year the national banks paid \$90,000 in taxes to the States and \$7,000,000 to the United States. They have rents, salaries and clerks to pay, and their profits are to be divided among the Government and the people. They are not likely to be returned because they are not profit enough. Yet admitting that it is profit enough, there is no reason for complaint, because any live man can work in it, and the enjoyment of the privileges and profits is thus open to all. I must say that during the last four or five years of my life on this subject I have concluded that our national banking system has excellencies that are not equalled by any system in the world."
